System Administration and Maintenance

Presented by:
Lieutenant Commander (IT) RMJP Nayanajith

BASIC NETWORK COMMANDS

* *Ping*
* *Ping to internet*
* *Tracert*
* *Nslookup*
* *Ipconfig / ifconfig*

Ipconfig

- **ipconfig:**
  - Displays basic TCP/IP network configuration values for all adapters, such as the IPv4 address, subnet mask, and default gateway.

- **ipconfig /all:**
  - Shows all current TCP/IP network configuration values and more details, including the physical address (MAC address), the IP address of the DHCP server, and DNS servers.

Ipconfig

- **ipconfig /release:**
  - Releases the current IP address lease for a specific adapter, typically used before `ipconfig /renew` to force the computer to request a new IP address from the DHCP server.

- **ipconfig /renew:**
  - Renews the IP address lease, requesting a new IP address from the DHCP server.

- **ipconfig /displaydns:**
  - Shows the contents of the DNS resolver cache, listing previously resolved DNS queries.

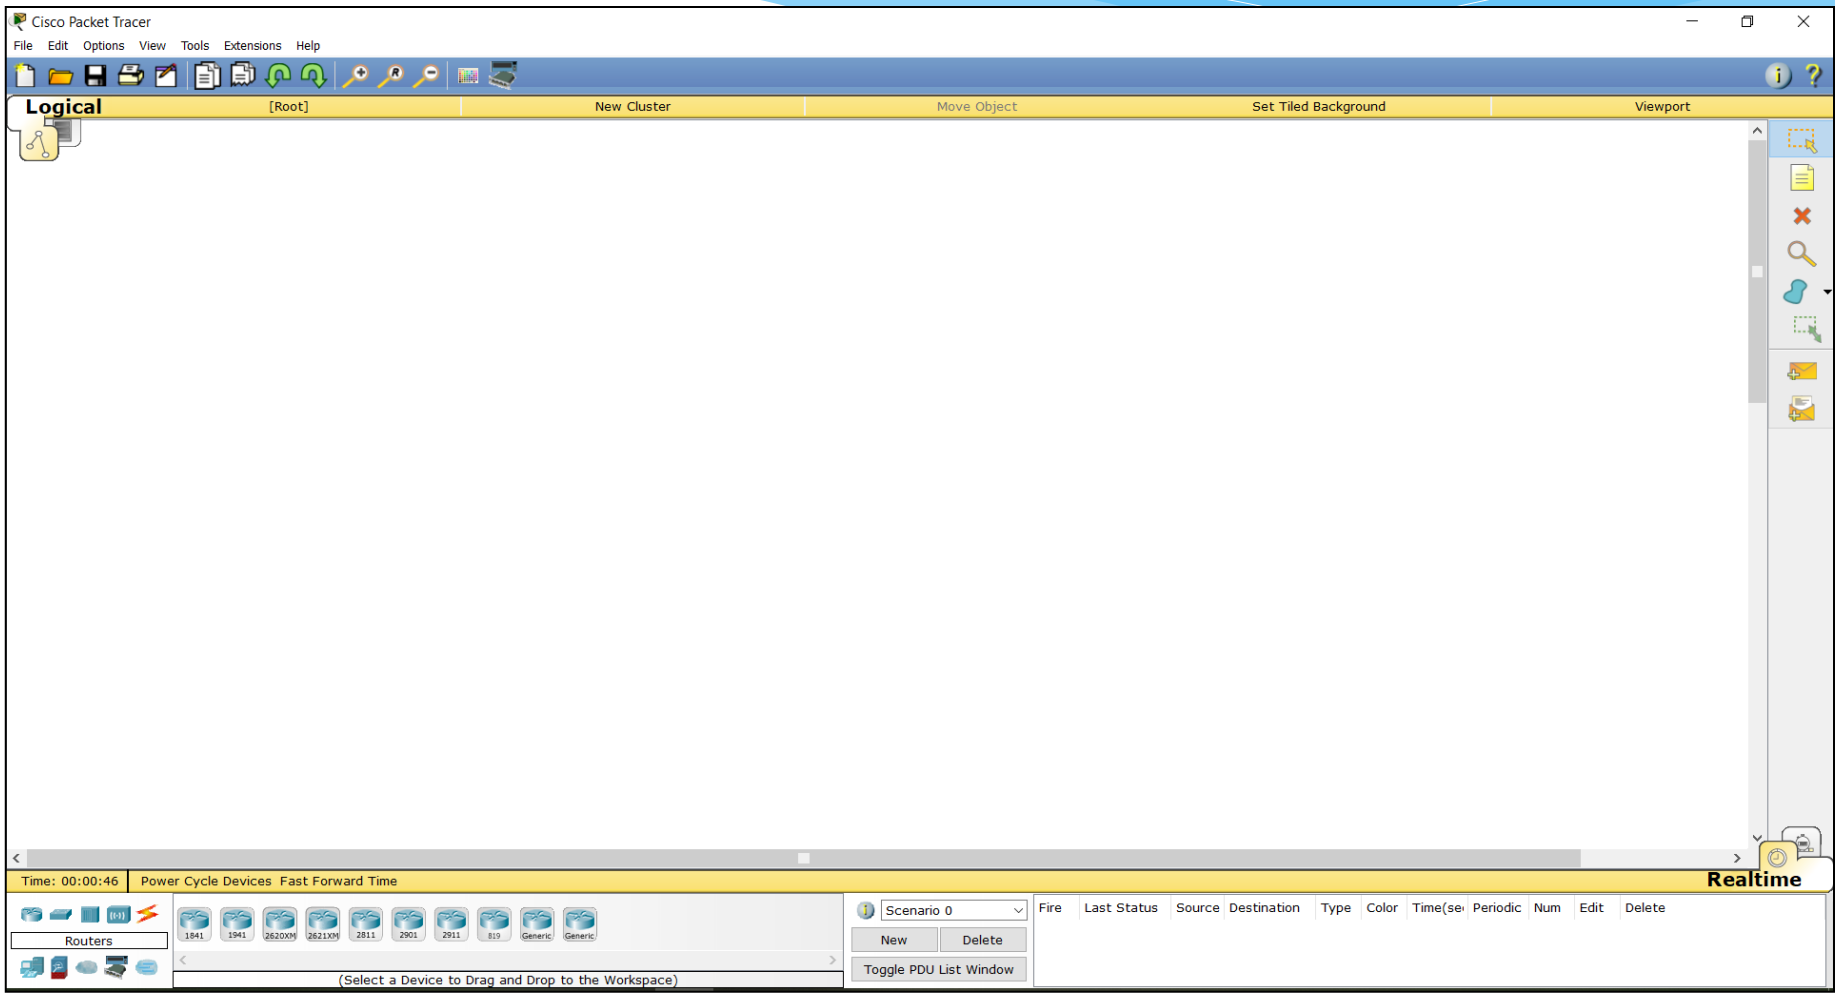

- **ipconfig /flushdns:**
  - Clears the DNS resolver cache, which can help resolve issues when a website isn't accessible due to outdated DNS information.

- **ipconfig /?:**
  - Displays a list of all available `ipconfig` commands and their functions.

PRACTICAL WORKS

* *Installation of packet Tracer software.*
* *Create a basic network with 02 PCs.*
* *Create a basic network with 02 PCs & Network Device.*

INSTALLATION OF PACKET TRACER SOFTWARE

THANK YOU
